THE THREE NUMBERS WE REVIEW EVERY MONDAY

Leads

10 a week

Every enquiry from anywhere. Someone put their hand up.

Speed to lead

90% inside 30 min

How fast we reply. The faster we are, the more we close.

Conversion

About 30%

Clients won divided by enquiries. Above 40% means we are too cheap.

WHAT YOU NEED TO DO

Emily

Enquiries and the daily log - every enquiry passes through you

- Log every enquiry the moment it lands: press + Log enquiry, or add it in the Log today box.
- Reply inside 30 minutes, then tick 'Replied within 30 minutes'.
- Screen it. Right fit? Book a strategy call with Elijah. Not a fit? Mark it and send the free resource.
- End of day, press Log today and finish the three steps. Takes five minutes.

Elijah

Sales and running the program - you close what Emily books

- Set up the Capacity page with Chloe this week. Nothing else can be planned until it is done.
- Work the Leads board: move each lead along as it progresses.
- On every proposal use the price the app suggests. It rotates current, mid and high so we learn what sticks.
- Mark won or lost honestly, with the reason. Lost reasons are how we learn.

Chloe

Backend and delivery - you keep delivery honest

- With Elijah, fill in Capacity: the team, their annual cost, and hours per client for each tier.
- Log hours per client for four weeks so we learn what each tier really costs.
- Watch 'What each tier earns and costs'. Flag any tier running over its hours.
- Keep clients current: new clients, fee changes, and an end date whenever someone leaves.

Dan and Blake

Directors - here for decisions, not data entry

- Read the top of the Dashboard: one verdict, four numbers. That is your week.
- Check 'What needs a person' and chase whatever is sitting there.
- The Monday email lands at 7am with the same numbers.
- Dan also helps Emily keep lead tracking up to date.

THE RHYTHM

Every day (Emily, 5 min): press Log today. Add the day's enquiries, confirm the numbers, note anything worth saying, save.

Every Monday (everyone, 15 min): read the email, open the Dashboard together, work through what needs a person, check which price point is winning.

Every month (Elijah and Chloe): update the assumptions in Settings, review the cheapest 30% of clients, and look at the margin outlook.

RULES WE AGREED

Every enquiry gets a reply within 30 minutes. No exceptions.

Log every enquiry, even when we are full. The goal is enough leads to pick the best clients, not to take everyone.

Never delete a client who leaves: add an end date, or churn and lifetime value go wrong.

Always pick a channel and a tier, or it will not show on the dashboard.

THE WORDS ON THE SCREEN

Average order value	Average monthly fee of new clients. Moving from about \$3,000 toward \$4,500.
LTV	Profit one client brings over their whole time with us.
Churn	Share of clients who left this month. Lower is better.
Tier	Which package a client is on: Ad Only, Tier 1, 2 or 3.

CAC	Cost to win one client: ad spend plus fixed sales costs, divided by clients won.
LTV:CAC	Profit per dollar spent winning a client. 3x or better is healthy.
MRR	Monthly recurring revenue: every active client's fee added up.
Price test in thirds	A third quoted at current price, a third mid, a third high. We watch where the pushback starts.

Everyone sees the same live numbers. If something looks wrong it is usually a missed daily log or a client without an end date - the Daily Log page can be edited. Still wrong? Tell Dan.
